

project brief

TYPE OF FACILITY:
Manufacturing Facility

Steklarna Hrastnik

■ Hrastnik, Slovenia

Steklarna Hrastnik is one of the leading European producers of special container glass and products in IS technology. Their product line consists of over 2000 different kind of products and more than 150 new products are developed each year.

In order to have an easy and fast installation, it was decided to install a range of Victaulic stainless steel couplings, reducers and fittings, in the chilled water line instead of using a traditional joining method. Due to the ease and speed of installation of the Victaulic grooved pipe joining solutions, compared to welding or flanging, the contractors Esot and CMC Ekocon were able to finish the project on time and because of the triple seal provided by Victaulic products, Steklarna Hrastnik is assured of a reliable system.

SPECIFICATIONS:

SERVICES:	PIPE MATERIALS:	PIPE SIZE RANGE:
Chilled Water	Stainless Steel	2 – 8"/50 – 219.1 mm
Chilled Water	Carbon Steel	2 – 8"/50 – 219.1 mm

MARKET:
Industrial

VICTAULIC SOLUTIONS:
Ease and Speed of installation
Reliability

OWNER:
Steklarna Hrastnik PE-Special

CONTRACTOR:
Esot d.o.o.
CMC Ekocon d.o.o.

ENGINEER/CONSULTANT:
Esot d.o.o.

COMPLETED DATE:
2005
